## EDUCATION

### San Jose State University

*M.S. in Artificial Intelligence (In Progress)*

San Jose, CA

*Expected 2026*

### California State Polytechnic University, Pomona

*B.S. in Computer Science; Minor in Entrepreneurship; GPA: 3.78/4.00, Dean's List*

Pomona, CA

*May 2021*

## EXPERIENCE

### Sun Net Inc.

*Software Engineer / Development Lead*

July 2021 – Present

*San Jose, CA*

- Serve as development lead for customer-facing initiatives, working directly with utility clients and end users to understand workflows, clarify requirements, and turn operational pain points into shipped software solutions.
- Led digital transformation efforts for multiple utility customers, delivering workflow and platform improvements that made day-to-day work easier, faster, and more organized across outage and grid management operations.
- Own delivery end to end across discovery, technical design, implementation, testing, rollout, and iteration; known for taking initiative and moving high-priority work forward without waiting for perfectly defined requirements.
- Currently leading delivery of a new solution supporting the UWPC Code in the Canadian grid, partnering closely with stakeholders to shape scope, translate domain needs into product decisions, and drive execution.
- Architected a central entity-linking system that decoupled 5 intertwined modules into composable components, and designed a workflow module that reduced customer effort by 80%+ while improving visibility into system behavior.

### Commonwealth Care Alliance

*Application Developer Intern & Part-time*

May 2019 – May 2021

*Boston, MA*

- Designed the backend of a new Provider Directory using the .NET Framework and integrated Google Maps API to improve search and location experiences for end users.
- Built an end-to-end data pipeline to ingest cybersecurity vendor data into BigQuery and created Looker dashboards that gave stakeholders a centralized view of security metrics and standards.

## PROJECTS

### Reagent – Git-Native Coding Agent | *Python, LLM Workflows, Git*

2026

- Built a Git-native coding agent focused on developer workflows, helping translate open-ended software tasks into structured execution steps.
- Emphasized practical usability, iteration speed, and agent-driven development patterns aligned with real engineering workflows.

### DietVA – Local Diet-Planning Agent | *Python, LangChain/LangGraph, Gradio, SQLite*

2025

- Built a conversational agent with tool-backed workflows for search, retrieval, calculation, and local data access, with logging and guardrails to improve reliability.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, C#, SQL, HTML/CSS/SCSS

**Frameworks/Libraries:** React, Node.js, Spring, Hibernate, .NET Framework, PyTorch, pandas, NumPy, LangChain/LangGraph

**Data & Analytics:** ETL, Batch Processing, Dashboarding, BigQuery, Looker, Data Modeling

**Databases:** MySQL, SQL Server, Oracle, SQLite

**Cloud & Tools:** Google Cloud Platform, Git, Docker

**Core:** Customer Discovery, Requirements Gathering, Rapid Prototyping, End-to-End Ownership, Stakeholder Collaboration, Production Support, Code Reviews, Mentorship
